EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below to correct minor antecedent basis issues in the claims. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lee Cheng (Reg. 40949) on September 5, 2008.

The application has been amended as follows:

Claim 34 has been amended as follows:

34. The displacement detector as set forth in claim 19, wherein
said coil portion is provided by a pair of inner and outer coils having different curvatures, which are disposed to be curved in substantially parallel with each other,
said core comprises a first core curved at a same curvature as said inner ~~coore~~ coil and supported to be rotatable about a rotation axis, and a second core curved at a same curvature as said outer ~~coore~~ coil and supported to be rotatable about the rotation axis,
an insertion amount of said first core into said inner ~~coore~~ coil is changed by rotating said first core about the rotation axis, and

an insertion amount of said second core into said outer ~~[eere]~~ coil is changed by rotating said second core about the rotation axis.

Claim 35 has been amended as follows:

35. The displacement detector as set forth in claim 19, wherein said signal processing circuit comprises a signal compensation circuit composed of ~~[an]~~ the A/D conversion circuit configured to convert a peak value of the output voltage of said coil portion into a digital signal, and a compensation circuit configured for digital trimming said digital signal.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Regarding claims 19 and 31-35, they are allowed for those reasons outlined in the Office Action mailed April 14, 2008.

Regarding claims 28-30, the prior art does not show or teach the signal processing comprising the peak-hold circuit, a circuit to add a level shift to the characteristic value from the peak-hold circuit and the temperature compensation circuit to perform compensation on the level shifted voltage in the manner as recited in the claims and having the features recited in the claims and in combination with the other features of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
